

THE MIRON EXPERIENCE

1 | RECEPTION

Today we are going to immerse you in the Miron Culture, which has evolved steadily over the past century. We believe we have created a truly informational and hands-on environment; one where learning is critical and collaboration is encouraged.

2 | ATRIUM OVERLOOK

The mobile suspended in our atrium represents the balance, harmony, and continual motion that occur within our organization. Each department is dependent upon the others. When they are working in perfect harmony, balance is achieved, creating successful teams and successful projects.

3 | WELCOME CENTER

In the Welcome Center, clients and visitors are introduced to the Miron Culture. It is here that plans for the day are shared and discussed.

6 | DIVISIONS OF CONSTRUCTION EXHIBIT

This is where we take the mystery out of project costs and break down the process of construction. Here, you can also see how Building Information Modeling (BIM) brings projects to life.

7 | ESTIMATING / WAR ROOM

Estimating at Miron is completed in two ways — conceptual and hard bid. In the "War Room," our clients experience the hard bid process. The divisions of construction wall plaques correlate with the different phone lines around the room.

8 | CI LAB

This interactive workspace, the first of its kind in Wisconsin, encourages collaboration by allowing multiple users to work simultaneously on one large screen. The space fosters a synergistic lab environment where everyone has the ability to leverage innovative technology and contribute in a meaningful way.

9 | WELLNESS CENTER

At Miron, it is our mission to take care of our employees. We consider our company a family organization and therefore, the health and well-being of our team is critical to us.

10 | EDWARD W. WENZLER TRAINING CENTER

At Miron, we try to instill in employees the importance of continually challenging and bettering oneself. Education is a key component of the Miron Culture. This space is also used by community organizations for board meetings and events.

15 | GREENHOUSE

As you have seen throughout our facility, sustainability is a key initiative for our organization. This greenhouse is simply another example of that.

16 | GALLERY / GUESTBOOK

The images represent a sampling of projects in our numerous market sectors, while the beam is symbolic of a topping-out ceremony. Every visitor and guest is invited to sign the beam so that a part of them becomes a part of our building.
